Conference Call

November 4, 2021

## FORWARD-LOOKING STATEMENTS

# Notes to Investors

Certain information set forth in this presentation contains “forward-looking information” and “forward-looking statements” within the meaning of Canadian and United States securities laws, including: the Company’s multi-year outlook, forecasts, or estimates. Forward-looking statements are statements that are not historical facts and are generally, although not always, identified by words such as “expect”, “plan”, “anticipate”, “project”, “intend”, “seek”, “target”, “potential”, “schedule”, “forecast”, “budget”, “estimate”, “intend” or “believe” and similar expressions or their negative connotations, or that events or conditions “will”, “would”, “may”, “could”, “should” or “might” occur and include information regarding: (i) expectations regarding whether the proposed Transaction will be consummated, including whether conditions to the consummation of the Transaction will be satisfied, or the timing for completing the Transaction and receiving the required regulatory and court approvals, (ii) the anticipated timing of the shareholders’ meetings of Calibre and Fiore and the mailing of the information circulars in respect of the meetings; (iii) expectations regarding the potential benefits and synergies of the Transaction and the ability of the combined company to successfully achieve business objectives, including integrating the companies or the effects of unexpected costs, liabilities or delays, (iv) expectations regarding additional mineral reserves and future production, (v) expectations regarding financial strength, free cash flow generation, trading liquidity, and capital markets profile, (vi) expectations regarding future exploration and development, growth potential for Calibre’s and Fiore’s operations, (vii) the availability of the exemption under Section 3(a)(10) of the U.S. Securities Act to the securities issuable in the Transaction, (viii) expectations with respect to annual gold production of Calibre, Fiore or the combined company, and (ix) expectations for other economic, business, and/or competitive factors. All such forward-looking statements are based on the opinions and estimates of management as of the date such statements are made. Forward-looking statements necessarily involve assumptions, risks and uncertainties, certain of which are beyond Calibre’s control, including risks associated with or related to: risks relating to widespread epidemics or pandemic outbreak including the COVID-19 pandemic; the impact of COVID-19 on our workforce, suppliers and other essential resources and what effect those impacts, if they occur, would have on our business; the volatility of metal prices; changes in tax laws; the dangers inherent in exploration, development and mining activities; the uncertainty of reserve and resource estimates; cost or other estimates; actual production, development plans and costs differing materially from the Company’s expectations; the ability to obtain and maintain any necessary permits, consents or authorizations required for mining activities; the current ongoing instability in Nicaragua and the ramifications thereof; environmental regulations or hazards and compliance with complex regulations associated with mining activities; the availability of financing and debt activities, including potential restrictions imposed on Calibre’s operations as a result thereof and the ability to generate sufficient cash flows; remote operations and the availability of adequate infrastructure; fluctuations in price and availability of energy and other inputs necessary for mining operations; shortages or cost increases in necessary equipment, supplies and labour; the reliance upon contractors, third parties and joint venture partners; the dependence on key personnel and the ability to attract and retain skilled personnel; the risk of an uninsurable or uninsured loss; adverse climate and weather conditions; litigation risk; competition with other mining companies; community support for Calibre’s operations, including risks related to strikes and the halting of such operations from time to time; conflicts with small scale miners; failures of information systems or information security threats; compliance with anti-corruption laws, and sanctions or other similar measures. For a listing of risk factors applicable to the Company, please refer to Calibre’s annual information form for the year ended December 31, 2020, available on [www.sedar.com](http://www.sedar.com). The list is not exhaustive of the factors that may affect Calibre’s forward-looking statements.

Forward-looking statements are neither historical facts nor assurances of future performance. Instead Calibre’s forward-looking statements are based on the applicable assumptions and factors management considers reasonable as of the date hereof, based on the information available to management at such time. These assumptions and factors include, but are not limited to, assumptions and factors related to Calibre’s ability to carry on current and future operations, including: development and exploration activities; the timing, extent, duration and economic viability of such operations, including any mineral resources or reserves identified thereby; the accuracy and reliability of estimates, projections, forecasts, studies and assessments; the availability and cost of inputs; the price and market for outputs, including gold; the timely receipt of necessary approvals or permits; the ability to meet current and future obligations; the ability to obtain timely financing on reasonable terms when required; the current and future social, economic and political conditions; and other assumptions and factors generally associated with the mining industry. Calibre’s forward-looking statements are based on the opinions and estimates of management and reflect their current expectations regarding future events and operating performance and speak only as of the date hereof. Calibre does not assume any obligation to update forward-looking statements, whether written or oral, if circumstances or management’s beliefs, expectations or opinions should change other than as required by applicable securities laws. There can be no assurance that forward-looking statements will prove to be accurate, and actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking statements. Accordingly, no assurance can be given that any events anticipated by the forward-looking statements will transpire or occur, or if any of them do, what benefits or liabilities Calibre will derive therefrom. For the reasons set forth above, undue reliance should not be placed on forward-looking statements.

**Currency** - All amounts are presented in US dollars (“\$”) unless otherwise stated.

# Focused Execution Driving Value

---

## Quarter over Quarter Execution; on track to hit high end of 2021 production guidance

- ▲ Gold Production: Q3 = 44,579 ounces, YTD = 133,537 ounces; on track to meet the high-end of guidance of 170,000 - 180,000 ounces

## Strong Financial Position; generating positive free cash flow with \$73M in cash, no debt & unhedged

- ▲ \$6.6 million increase in cash from Q2
- ▲ \$0.21 per share in cash

## Resource Expansion and Discovery drilling underway

- ▲ Multiple rigs at Pavon Central/South, Eastern Borosi, Limon and Libertad
- ▲ Approval of new concessions along the Western Epithermal Belt

## Multi-year mine life supported by >200% increase to Reserves

- ▲ Updated December 31, 2020 to 864,000 ounces at 4.49 g/t gold<sup>1</sup>

## Adding satellite mines (“Mining Spokes”) to fuel production and cash flow growth

- ▲ Demonstrated execution at Pavon Norte, advancing Eastern Borosi
- ▲ >50% installed surplus processing capacity at Libertad

## World Gold Council Responsible Gold Mining Principles Year One Progress

- ▲ Self-assessment and third-party independent assurance report complete

# Q3 & YTD 2021 Financial Results

## Increasing Cash While Investing in Growth

- ▲ Investing in mine development and significant exploration
- ▲ Debt-free and unhedged
- ▲ Q3 \$0.08 and YTD \$0.25 cash flow per share

	Q3 2021	Q3 2020	YTD 2021	YTD 2020
Gold Ounces Produced (oz)	44,579	45,341	133,357	93,435
Gold Ounces Sold (oz)	44,471	44,842	134,035	93,023
<i>\$'000s except per ounce and per share amounts</i>				
Revenue	\$79,204	\$85,791	\$240,023	\$163,071
Net income	\$15,021	\$32,930	\$43,550	\$40,158
Net income per share (basic)	\$0.04	\$0.10	\$0.13	\$0.12
Net cash provided by operating activities	\$28,341	\$45,592	\$83,211	\$52,525
Average Realized Gold Price (\$/oz) <sup>1</sup>	\$1,781	\$1,913	\$1,791	\$1,753
Total Cash Costs (\$/oz) <sup>1</sup>	\$980	\$786	\$1,008	\$850
AISC (\$/oz) <sup>1</sup>	\$1,097	\$963	\$1,135	\$1,041

# Pavon Norte Satellite Mine Case Study

## Q4 2019

- ▲ Oct: Acquired “Non 43-101” compliant underground project
- ▲ Dec: Submitted permit application for an open pit

## Q1 2020

- ▲ Jan: Declared NI 43-101 open pit resource (Ind Resource of 230koz at 5.16 g/t Au, Inf Resource of 62koz at 3.39 g/t Au)<sup>1</sup>

## Q1 - Q3 2020

- ▲ Continued community, local government and public consultation
- ▲ Advanced PFS level studies
- ▲ Aug: Received regulatory approvals for open pit mining

## Q4 2020

- ▲ Commenced site access road and early works construction

## 2021 Ore delivery to Libertad

- ▲ Q1: Avg 350 tonnes per day (tpd)
- ▲ Q2: Avg 550 tpd
- ▲ Q2: Avg 850 tpd, with target EoY 2021 haul rate of 1,000 tpd exceeded in September

***“From permit to plant; the team delivered 1,000 tpd of high-grade ore to Libertad in less than 22 months”***

***“Analogous to Pavon Norte, Eastern Borosi Project will be the next ‘Mining Spoke’....”***

# Self-funded Organic Production Growth

## Eastern Borosi (anticipated milestones)

- ▲ Resource expansion and discovery drilling underway
- ▲ Prefeasibility study Q1 2022
- ▲ Permit approvals H1 2023
- ▲ Construction/development H1 2023
- ▲ Ore delivery to Libertad H2 2023
- ▲ Low capital, high return opportunity to utilize installed processing capacity at Libertad

*“Adding new mill feed sources for Libertad and providing operational flexibility to deliver on our commitments”*

## Atravesada Underground at Limon, Discovered in 2020

- ▲ Resource conversion and expansion drilling extended ~200 metres below current resource<sup>1</sup>
- ▲ Underground development underway
- ▲ Ore mining expected to commence Q1 2023 (Indicated Resource grade of 6.2g/t gold)<sup>2</sup>

## Pavon Central (anticipated milestones)

- ▲ Resource expansion drilling underway
- ▲ Permit approval Q1 2023
- ▲ Construction/development Q2 2023
- ▲ Ore delivery to Libertad H2 2023 (Open pit Reserve grade of 6.9g/t gold)<sup>2</sup>

*“>50% surplus mill capacity provides opportunity for low-cost production growth”*

# Resource Expansion and Discovery Drilling<sup>1</sup>

## Eastern Borosi

- ▲ 29.0km of resource conversion drilling completed at Guapinol/Vancouver and Riscos
- ▲ Resource expansion and discovery drilling at Guapinol/Vancouver, Riscos and earlier stage targets, 7.5km underway

## Limon

- ▲ 20.0km of resource expansion and conversion drilling completed YTD
- ▲ Focusing on new targets identified in less explored areas, 3.7km underway

## Libertad

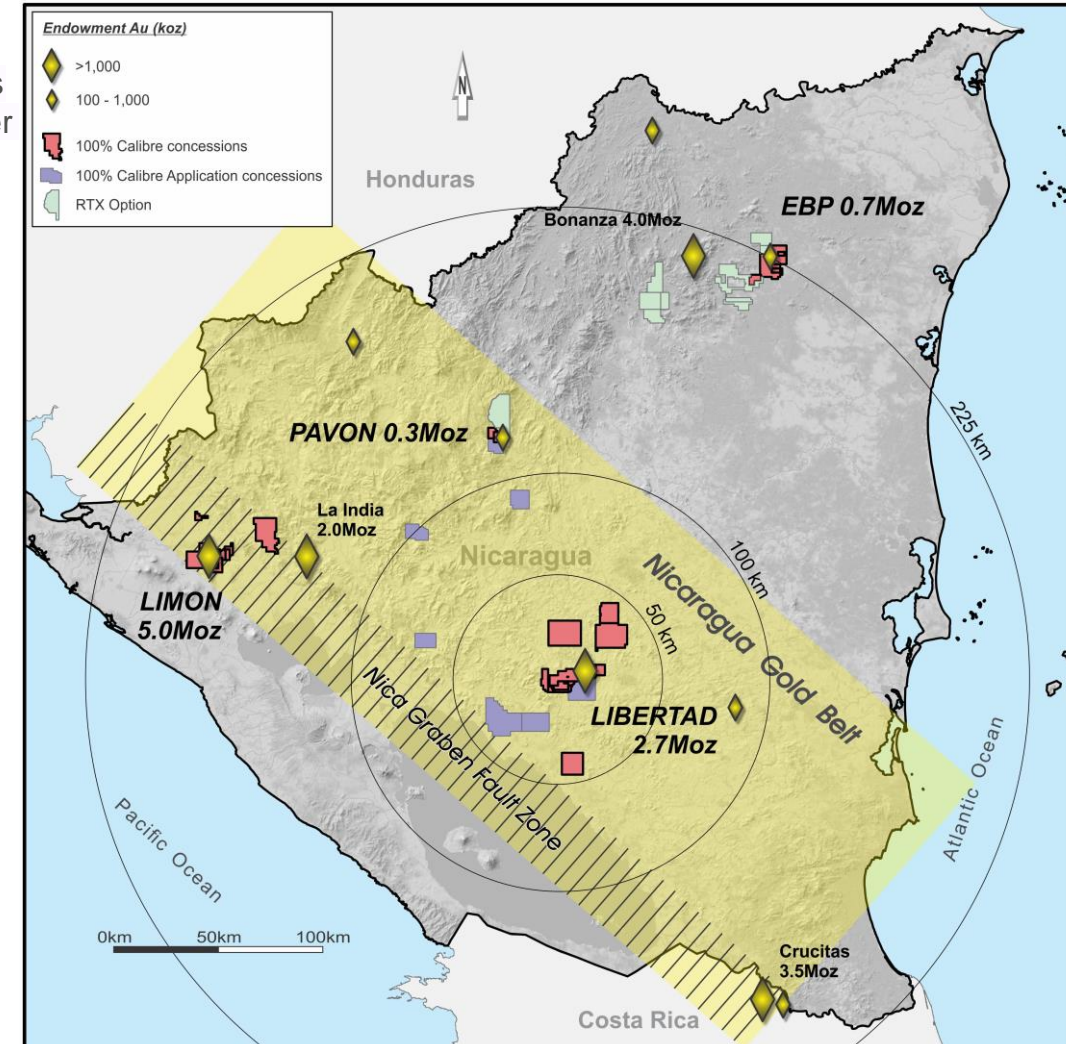

- ▲ 17.5km of resource expansion and conversion drilling completed YTD
- ▲ Focusing on emerging targets at Cosmatillo and Amalia, 6.7km underway

## Pavon

- ▲ 10.5km of resource expansion and conversion drilling completed YTD
- ▲ Focusing on resource expansion drilling at Pavon Central, 6.0km underway

## Rio Tinto Joint Venture Option and Exploration Alliance

- ▲ Progressing first pass reconnaissance exploration and drilling on 5 district scale copper porphyry targets

# Building a Growth-Oriented, Americas-Focused Mid-Tier Gold Producer<sup>1</sup>

## Diversified Production Base in the Americas

- ▲ Combined consensus gold production **~245,000 ounces/year (2022-2023E)** from three established operations in the Americas
- ▲ Nevada consensus gold production of **~50,000 ounces per year (2022-2023E)**
- ▲ Supported by 4.4Moz Measured & Indicated and 3.1Moz inferred mineral resource

## Strong Financial Position

- ▲ Pro-forma balance sheet with over **\$96 million in cash** and zero bank debt
- ▲ Strong free cash flow generation to fully fund exploration & organic growth

## Robust Organic Growth Pipeline

- ▲ Exceptional pipeline of growth projects including Gold Rock in Nevada and Eastern Borosi in Nicaragua
- ▲ Multiple near-mine, high impact exploration targets to support mineral reserve and mine life expansion

## Value Proposition

- ▲ Attractive relative valuation versus peers

## Market Presence

- ▲ Enhanced trading liquidity with index inclusion

# Appendix

# Q3 & YTD 2021 Operating Results

Surface Mining	Q3 2021	Q3 2020	YTD 2021	YTD 2020
Ore mined (t)	437,964	430,405	1,241,107	1,167,358
Ore mined grade (g/t Au)	2.59	3.41	2.68	2.83
Waste mined (t)	3,800,635	4,465,655	12,262,599	11,905,344
Underground Mining				
Ore mined (t)	100,700	36,424	291,540	78,401
Ore mined grade (g/t Au)	4.78	3.75	4.20	3.86
Processing				
Ore milled (t)	497,507	506,748	1,378,689	1,227,929
Grade (g/t Au)	3.20	3.02	3.27	2.67
Au recovery (%)	92.2%	91.6%	92.3%	91.7%
Gold production (ozs)	44,579	45,341	133,537	93,435

- ▲ Q3 Ore delivery to Libertad:
  - ▲ Consistent >1,000 tonnes per day through 2021 from Limon
  - ▲ 848 tonnes per day Pavon to Libertad (↑ 53% vs Q2 2021) reaching 1,077 tonnes per day during September (hitting 2021 target ahead of schedule)
- ▲ Commercial production from Panteon underground at 7.77 g/t (↑ 21% from Q2 2021)
- ▲ Underground performance and grade steadily increased quarter over quarter
- ▲ Limon Central pit grade at 3.33 g/t (↑ 27% from Q2 2021 in line with expectations)

# Platform for Growth

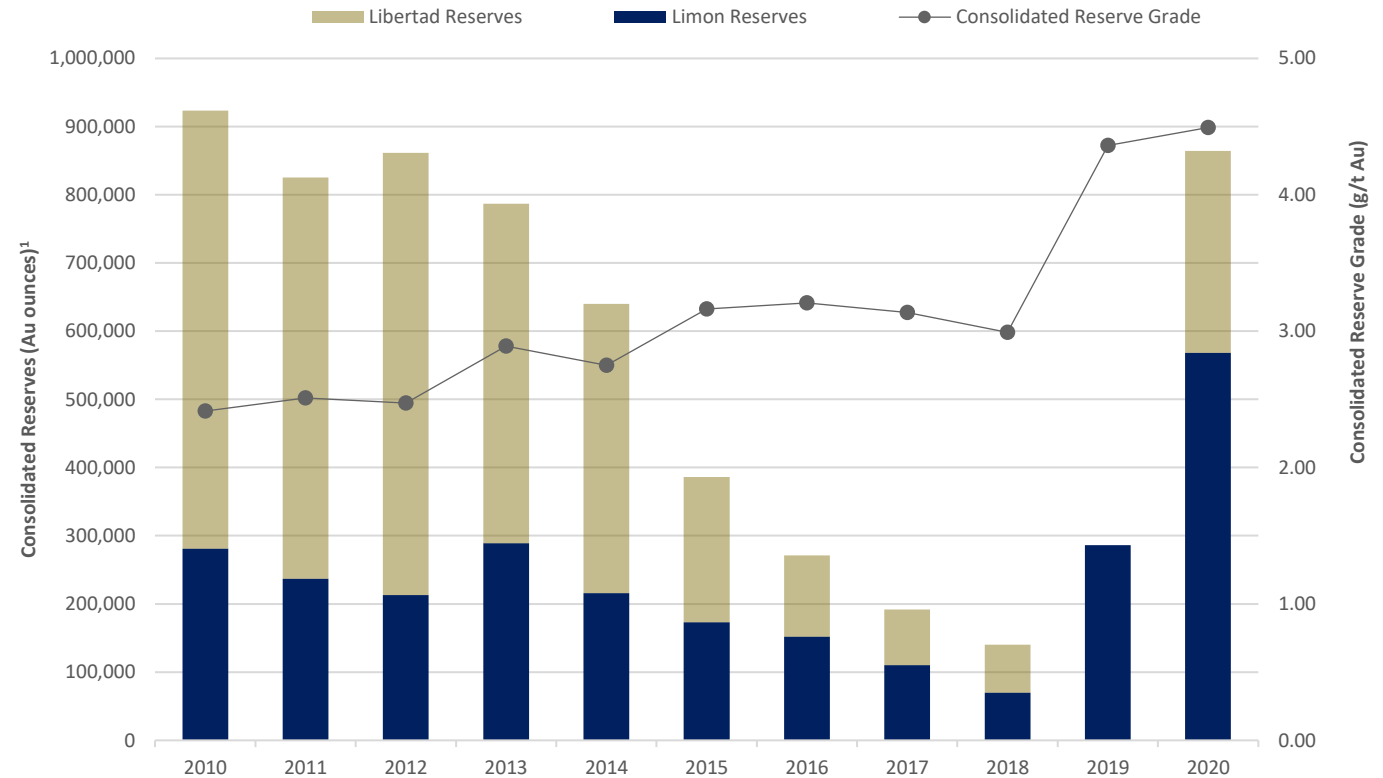

## Mineral Reserves Increased by >200% to 864,000 ounces in 2020<sup>1</sup>

### Significant History

- ▲ Two independent operations delivered >5.5 Moz of past production

### Integrating the Assets<sup>2</sup>

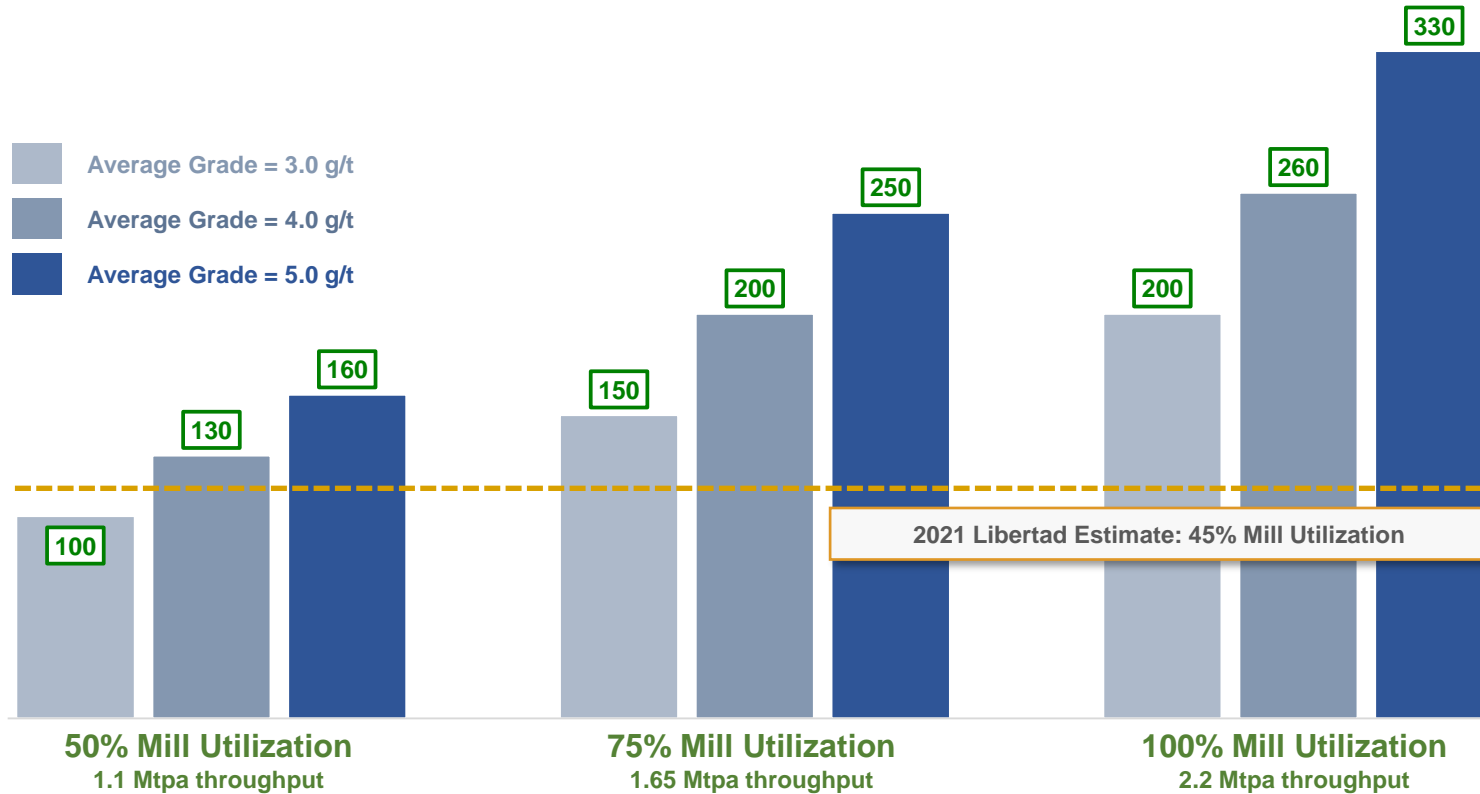

- ▲ Calibre has demonstrated six quarters of production
- ▲ Debottlenecking operations and de-orphaning satellite deposits
- ▲ Libertad: “forecast to close” in 2020 to five years of processing life
- ▲ Developed Pavon Norte: ‘Permit to Plant’ in less than 18 months
- ▲ New discoveries at Atravesada and Panteon
- ▲ Advancing the Eastern Borosi District as the next “Mining Spoke”

# Libertad Mill Utilization Opportunity

## Libertad Annual Gold Production (koz) vs. Mill Utilization and Grade

December 31, 2020 Reserve grade 4.49 g/t Au<sup>1</sup>

1. See Resources and Reserves in Appendix. Note: Assumes an average recovery of 93%

# Summary of Mineral Reserves and Resources (West Nicaragua)

December 31 2020

Producing & Advanced Exploration Properties

Mineral Reserves – Dec 31, 2020	Category	Tonnage (kt)	Grade (g/t Au)	Grade (g/t Ag)	Contained Au (koz)	Contained Ag (koz)

# MRMR Notes (West Nicaragua)

## Additional Notes for Mineral Reserves and Resources page:

### Note 2 - Limon Mineral Reserve Notes

1. CIM (2014) definitions were followed for Mineral Reserves and rounded and reported in dry tonnes.
2. Underground Mineral Reserves are estimated at fully costed and incremental cut-off grades of 3.3 g/t Au and 2.2 g/t Au, respectively, for Santa Pancha 1; 3.5 g/t Au and 2.2 g/t Au, respectively, for Panteon; and 2.6 g/t Au and 1.8 g/t Au, respectively, for Veta Nueva.
3. Open pit Mineral Reserves are estimated at a cut-off grade of 1.24 g/t Au, and incorporate estimates of dilution and mining losses.
4. Mineral Reserves are estimated using an average long-term gold price of US\$1,400 per ounce.
5. A minimum mining width of 1.5 m was used for underground Mineral Reserves.
6. Bulk density varies between 2.30 t/m<sup>3</sup> and 2.41 t/m<sup>3</sup> for all open pit Mineral Reserves; Bulk density varies between 2.47 t/m<sup>3</sup> to 2.50 t/m<sup>3</sup> for all underground Mineral Reserves.
7. A mining extraction factor of 95% was applied to the underground stopes. Where required a pillar factor was also applied for sill or crown pillar. A 100% extraction factor was assumed for development.

### Note 3 - Libertad Mineral Reserve Notes

1. CIM (2014) definitions were followed for Mineral Reserves and rounded and reported in dry tonnes.
2. Underground Mineral Reserves are estimated at fully costed and incremental cut-off grades of 3.05 g/t Au and 1.90 g/t Au, respectively, and incorporates 0.5 m dilution in both hanging wall and footwall.
3. Open pit Mineral Reserves are estimated at a cut-off grade of 1.50 g/t Au for Pavon Norte and Pavon Central, and incorporate estimates of dilution and mining losses.
4. Open pit Mineral Reserves are estimated at a cut-off grade of 0.92 g/t Au for Jabali Antena, and incorporate estimates of dilution and mining losses.
5. Mineral Reserves are estimated using an average long-term gold price of US\$1,400 per ounce.
6. A minimum mining width of 1.5 m was used for underground Mineral Reserves.
7. Open pit and underground bulk density varies from 1.70 t/m<sup>3</sup> to 2.61 t/m<sup>3</sup>; underground backfill density is 1.00 t/m<sup>3</sup>.
8. A mining extraction factor of 95% was applied to the underground stopes. Where required a pillar factor was also applied for sill or crown pillar. A 100% extraction factor was assumed for development.

### Note 4 – Limon Mineral Resource Notes

1. Effective dates are December 31, 2020 for all El Limon deposits.
2. CIM (2014) definitions were followed for Mineral Resources and numbers may not add up due to rounding.
3. A cut-off grade of 1.15 g/t Au is used for Limon OP, 2.40 g/t for Limon UG, 3.05 g/t for SP1 UG, 2.25 g/t for SP2 UG, 2.41 g/t for Veta Nueva UG, 3.25 g/t for Panteon UG, 0.00 g/t for Tailings, and 2.60 g/t for Atravesada UG.
4. Reporting shapes were used for reporting Limon UG, SP1 UG, Veta Nueva UG, Panteon UG, and Atravesada UG.
5. Mineral Resources are estimated using a long-term gold price of US\$1,500/oz Au in all deposits.
6. Bulk density varies between 2.30 t/m<sup>3</sup> and 2.50 t/m<sup>3</sup>.
7. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
8. Mineral Resources are inclusive of Mineral Reserves.

### Note 5 – Libertad Mineral Resource Notes

1. Effective dates are December 31, 2020 for all La Libertad deposits except San Antonio OP, with an effective date of August 30, 2020. The Pavon estimate has an effective date of November 12, 2019.
2. CIM (2014) definitions were followed for Mineral Resources.
3. A cut-off grade of 0.85 g/t Au is used for Jabali Antena OP, 0.81 g/t for Rosario OP, 0.80 g/t for Socorro OP and San Antonio OP, 2.90 g/t for San Juan UG, San Diego UG and Mojón UG, and 2.84 g/t for Jabali West UG and Jabali East UG, and 1.17 g/t Au for Pavon.
4. Reporting shapes were used for reporting Jabali West UG.
5. Mineral Resources are estimated using a long-term gold price of US\$1,500/oz Au in all deposits except Pavón Sur, estimated using a long-term gold price of US\$1,400/oz Au.
6. Bulk density varies between 1.70 t/m<sup>3</sup> and 2.57 t/m<sup>3</sup>.
7. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
8. Mineral Resources are inclusive of Mineral Reserves.
9. Numbers may not add up due to rounding.

# Summary of Mineral Reserves and Resources (East Nicaragua)

## Exploration Properties – Eastern Nicaragua

Deposit	Category	Tonnes (000s)	Mineral Resources <sup>1 2 4</sup>					
			Grade (g/t Au)	Grade (g/t Ag)	Grade (% Cu)	Gold (000oz Au)	Silver (000oz Ag)	Copper (Mlbs Cu)
Rosita D JV	Indicated	2132	0.47	7.3	0.5	32	502	23
<b>Total Indicated</b>		<b>2132</b>	<b>0.47</b>	<b>7.3</b>	<b>0.5</b>	<b>32</b>	<b>502</b>	<b>23</b>
Primavera	Inferred	44,974	0.54	1.1	0.22	782	1,661	218
Cerro Aeropuerto	Inferred	6,052	3.64	16.2	-	708	3,145	-
Eastern Borosi Project	Inferred	4,418	4.93	80.0	-	701	11,360	-
<b>Total Inferred</b>		<b>55,444</b>	<b>1.23</b>	<b>9.07</b>	<b>0.178</b>	<b>2,190</b>	<b>16,165</b>	<b>218</b>

Notes:  
 1. CIM (2014) definitions were followed for classification of Mineral Resources. 2. Mineral Resources are estimated at a cut-off grade of 2.0 g/t AuEq for resources potentially mined by underground methods and 0.42 g/t AuEq for resources potentially mined by open-pit methods. 3. Mineral Resources and gold-equivalent cut-off grades were estimated using long-term gold prices of US\$1,500 per ounce and US\$23 per ounce of silver. Gold equivalent cut-off values were calculated using the formula: AuEq (g/t) = Au (g/t) + Ag (g/t) / (101.8) 4. A minimum mining width of 2.4 meters was used for underground and 3 metres for open-pits. 5. Bulk density is 2.65 t/m3 for Blag, East Dome, Riscos De Oro and La Luna, and 2.60 t/m3 for Guapinol and Vancouver. 6. East Dome is included in the Blag resource model and Vancouver is included in the Guapinol resource model. 7. Numbers may not add due to rounding. 8. Mineral Resources that are not Mineral Reserves do not have economic viability. 9. For further details refer to 'NI 43-101 Technical Report on the Eastern Borosi Project, Nicaragua' dated May 11, 2018.

## Summary Of Inferred Mineral Resources – As Of March 15, 2018 Eastern Borosi Project

Category	Category	Tonnage (000t)	Grade (g/t Au)	Grade (g/t Ag)	Contained Au (000oz)	Contained Ag (000oz)
Blag UG	Inferred	740	3.01	117	72	278
East Dome UG	Inferred	513	2.23	219	37	3,611
Riscos de Oro UG	Inferred	1,184	5.73	106	218	4,047
Guapinol UG	Inferred	612	12.74	12	251	243
Vancouver UG	Inferred	170	8.54	15	47	82
<b>Total UG</b>	<b>Inferred</b>	<b>3,219</b>	<b>6.03</b>	<b>104</b>	<b>624</b>	<b>10,759</b>
La Luna OP	Inferred	1,199	1.98	16	77	601
<b>Total Eastern Borosi project</b>	<b>Inferred</b>	<b>4,418</b>	<b>4.93</b>	<b>80</b>	<b>701</b>	<b>11,360</b>

Source: 1. Calibre Mining Resources and Reserves Technical Reports and December 31, 2019 Annual Information Form, see disclosure slides, for references to specific technical reports 2. Numbers may not add due to rounding 3. Calibre owns 33% of the Rosita D project and the Eastern Borosi Gold Project which are reflected in the resource estimation numbers presented. 4. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral resource estimates do not account for mineability, selectivity, mining loss and dilution, There is no certainty that inferred mineral resources will be converted to measured and indicated categories through further drilling or into mineral reserves once economic considerations are applied.

# Disclosure

---

## Non-IFRS Measures

Calibre Mining believes that investors use certain indicators to assess gold mining companies. The indicators are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance in accordance with the International Financial Reporting Standards.

### Total cash costs per ounce of gold

Total cash costs include mine site operating costs such as mining, processing and local administrative costs (including stock-based compensation related to mine operations), royalties, production taxes, mine standby costs and current inventory write downs, if any. Production costs are exclusive of depreciation and depletion, reclamation, capital and exploration costs. Total cash costs per gold ounce are net of by-product silver sales and are divided by gold ounces sold to arrive at a per ounce figure.

### All-In Sustaining Costs per Ounce of Gold Sold (“AISC”)

AISC is a performance measure that reflects the expenditures that are required to produce an ounce of gold from current operations. While there is no standardized meaning of the measure across the industry, the Company’s definition is derived from the definition, as set out by the World Gold Council in its guidance dated June 27, 2013 and November 16, 2018, respectively. The World Gold Council is a non-regulatory, non-profit organization established in 1987 whose members include global senior mining companies. The Company believes that this measure is useful to external users in assessing operating performance and the ability to generate free cash flow from operations.

Calibre defines AISC as the sum of Total Cash Costs (per above), sustaining capital (capital required to maintain current operations at existing production levels), capital lease repayments, corporate general and administrative expenses, exploration expenditures designed to increase resource confidence at producing mines, amortization of asset retirement costs and rehabilitation accretion related to current operations. AISC excludes capital expenditures for significant improvements at existing operations deemed to be expansionary in nature, exploration and evaluation related to resource growth, rehabilitation accretion not related to current operations, financing costs, debt repayments, and taxes. Total AISC is divided by gold ounces sold to arrive at a per ounce figure.

### Average Realized Price per Ounce Sold

Average realized price per ounce sold is a common performance measure that does not have any standardized meaning. The most directly comparable measure prepared in accordance with IFRS is revenue from gold sales

## Additional Information

**Notes for Summary of Mineral Reserves and Resources page:** For information regarding the most recent mineral resource and reserve estimates please review the year ended December 31, 2019 Annual Information Form filed on SEDAR. For all additional technical information please see the technical reports titled: Calibre Mining Corp. Technical Report on the El Limon Mine, Leon and Chinandego Departments, Nicaragua dated Aug 30, 2019 effective June 30, 2019, Calibre Mining Corp. Technical Report on the La Libertad Mine, Chontales Department Nicaragua dated Aug 30, 2019 effective June 30, 2019, Pavon Project Resources Estimation dated Jan 9, 2020 effective Nov. 12, 2019, IAMGOLD CORPORATION AND CALIBRE MINING CORP. TECHNICAL REPORT ON THE EASTERN BOROSI PROJECT, NICARAGUA DATED MAY 11, 2018, PRIMAVERA PROJECT RESOURCE ESTIMATE dated Jan 31, 2017, Calibre Mining NI 43-101 Technical Report and Resource Estimation on the Cerro Aeuropuerto and La Luna Deposits, Borosi Concessions, Nicaragua dated April 11, 2011 (collectively, the “**Technical Reports**”).

**Notice to U.S. Investors:** Information concerning the properties and operations referred to herein, and in certain publicly available disclosure filed on SEDAR by each company, uses terms that comply with reporting standards in Canada. In particular, certain estimates of mineralized material are made in accordance with Canadian National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* (“**NI 43-101**”), under guidelines set out in the CIM Standards on Mineral Resources and Mineral Reserves adopted by the CIM Council on May 10, 2014.

NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects.

Unless otherwise indicated, all reserve and resource estimates referred to herein or publicly available on SEDAR have been prepared in accordance with NI 43-101. **These NI 43-101 standards differ significantly from the requirements of the SEC, and such resource information may not be comparable to similar information disclosed by U.S. companies.** For example, while the terms “mineral resource”, “measured resource”, “indicated resource” and “inferred resource” are recognized and required by Canadian regulations, they are not recognized by the SEC. It cannot be assumed that any part of the mineral deposits in these categories will ever be upgraded to a higher category. These terms have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that any part of an inferred resource exists. In accordance with Canadian rules, estimates of “inferred resources” cannot form the basis of feasibility or pre-feasibility studies. In addition, under the requirements of the SEC, mineralization may not be classified as a “reserve” unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. Finally, disclosure of contained ounces is permitted disclosure under Canadian regulations, however, the SEC normally only permits issuers to report resources as in place tonnage and grade without reference to unit measures.

### Qualified Person

Darren Hall, MAusIMM, President & CEO for Calibre Mining is the Qualified Person as set out under NI 43-101 has reviewed and approved the scientific and technical information in this corporate presentation. Detailed descriptions, results and analysis of drilling, sampling and analytical procedures, QA/QC programs and resource and reserve estimation methodology can be found in the Technical Reports.
